QUALITY ASSURANCE

Surgical Holdings is an ISO 9001 and ISO 13485 accredited company. Its comprehensive quality management system is in accordance with the requirements of the Medical Device Directive 93/42/EEC - Annex I & II, for temporary orthopaedic surgical implants - skeletal pins, wires, staples, guide wires - and all associated instrumentation.

All Surgical Holdings products undergo rigorous testing and inspection to applicable harmonised standards before leaving the factory.

The company offers CE marking on all Class I instrumentation, Class IIa and IIb implants, and can provide certificates of conformity for all materials used.

Complete traceability throughout all aspects of the production process provides the customer with a fully documented quality control system.

All instrumentation carries a lifetime guarantee from the date of purchase on any fault found as a result of poor materials. This warranty is void, however, if repairs are carried out by anyone other than Surgical Holdings repair personnel, or if it is deemed to have been misused.
