

Extremities Catalogue

UK manufactured specialist instruments
for hand and foot surgery

 Proud to be a family-run British company

Promoting education;
sharing knowledge and
offering training opportunities

Surgical Holdings presents a catalogue of instruments designed specifically for surgery on the hands and feet

Working closely with customers, Surgical Holdings has been able to continually develop and innovate in the surgical instrument field, drawing from the expertise and craftsmanship gained over 25 years trading and over 50 years of family involvement in the surgical instrument manufacturing industry.

Manufacturing only the highest quality instruments from steels complying with British Standards ensures the best performance and longevity. Furthermore, utilising metallurgical testing, tracking and traceability of materials and 100% inspection procedures provides transparency and reliability.

Quality Assurance

We are an ISO 13485 accredited company.

Our comprehensive quality management system is in accordance with the requirements of the Medical Device Directive 93/42/EEC - Annex I & II, for temporary orthopaedic surgical implants - skeletal pins, wires, staples, guide wires - and all associated instrumentation.

All Surgical Holdings products undergo rigorous testing and inspection to applicable harmonised standards before leaving the factory. We offer CE marking on all Class I instrumentation, Class IIa and IIb implants, and can provide certificates of conformity for all materials used. Complete traceability throughout all aspects of the production process provides our customers with a fully documented quality control system.

All instrumentation carries a lifetime guarantee from the date of purchase on any fault found as a result of poor materials. This warranty is void, however, if repairs are carried out by anyone other than Surgical Holdings repair personnel, or if it is deemed to have been misused.

Please contact us or visit our website for current reprocessing instruction.

About Us

Surgical Holdings is a family run business, established for 30 years and counting. Based in Southend-on-Sea, we are an Award-winning British Surgical Instrument Manufacturer and Repairer, facilitating Sustainability in Surgery; through our range of Reusable Instruments and Laparoscopic Instruments, of which can be serviced in-house by our experienced and specialist technicians. Our Smart Repair service for Rigid Endoscopes and our 'as new' full Surgical Tray Refurbishments, save 50% in CO2 vs buying new. We also distribute key industry brands, including the Bookwalter Retractor.

Our **Mission** is to sustainably manufacture, service and distribute medical devices for the UK healthcare sectors and export partners worldwide. Expertly working to our specialisms, whilst promoting education and continual development of our employees, we maintain our dedication to our safety, unique skill, products and services.

Surgical Holdings' **Vision** is to be recognised by our stakeholders as the most passionate, authentic and knowledgeable Surgical Instrument Manufacturer and Service provider in the UK.

Values:

EDUCATION

TRANSPARENCY

FAMILY

PASSION

RESOURCEFULNESS

Visit Us

We are always happy to invite visitors to come and see our strong family ethos in action at our Southend-on-Sea workshop.

We're in an excellent location for export customers, just 40 miles from London, at the mouth of the Thames Estuary.

 **By road:** A13 or A127 to M25
Dartford Tunnel and south coast ports

 **By rail:** Direct links to London
Liverpool Street, London Fenchurch
Street & St Pancras International
via Stratford

 **By air:** International flights from
Heathrow or Gatwick 90 minutes
away, Stansted 60 minutes, and
Southend airport is just 10 minutes
away with direct flights to major
cities across Europe

**Surgical Holdings, Parkside Centre,
Temple Farm Industrial Estate,
Southend-on-Sea, Essex, SS2 5SJ**

SMART Repair

SMART REPAIR

SURGIFIX
ONLINE PORTAL

Smart Repair is our unique repair service for surgical instruments, offering the promise of long-term value for money in choosing the sustainable option, and a product replacement if we are unable to return the instrument to an 'as new' condition*.

Surgifix Repair Portal

- ✓ The only company offering the ability to manage and monitor repairs online, giving customers direct access to communicate with the repairs team
- ✓ Customers can view pricing, run reports and view the progress of repairs on the Surgifix Repair Portal
- ✓ Instant notifications allow the repairs team and customers to communicate seamlessly regarding what needs a repair or refurbishment
- ✓ Training is available and can be done by video link if required

*For the price of the repair. Applies to the 50 most used and repaired products, correct at the time of going to press.

+

An easy to use system with up to date information on all repairs

Bespoke fixation

Instruments of this quality and precision should be maintained and protected.

We can provide bespoke fixation for any set in a secure DIN basket. The instruments are mounted in the medical grade plastic runner to prevent damage during washing and transport.

Duo surface finish

Surgical Holdings have utilised their combined expertise and knowledge to introduce a new and exclusive DUO surface finish. By reviewing research and understanding the requirements of their customers they have combined two surface finishes on to one instrument. The first maintains anti-glare under theatre lights and the second ensures the best possible cleaning efficacy.

The company's highly skilled instrument finishers ensure that prior to any final stage finishing, all instruments receive a high level mopping to remove any imperfections.

From there they can then apply The Mirror Polish and Wet Bead Blast Finishes.

The Mirror Polish Finish

This technique uses a series of mops and compounds to polish the surface up to a mirror finish.

The Wet Bead Blast Finish

This technique uses ultra-fine glass beads sprayed at the surface of the instrument to create a matt looking finish.

The result is a premium looking instrument which stands out, maintains functionally under theatre lights but above all has been proven to provide benefits against protein adhesion and corrosion.
