Anglia Ruskin University

Cambridge Chelmsford Peterborough

Further your career with a Foundation Degree or BSc (Hons) in Decontamination Sciences from Anglia Ruskin University's Faculty of Health, Social Care & Education. These courses have been developed in conjunction with the Institute for Decontamination Sciences, for sterilise services technicians, leads and managers to provide best practice and high standards in infection prevention.

Available via Distance learning starting January & September 2014. Register your interest: 01245 493 131 or alex@anglia.ac.uk

surgicalholdings

UK MANUFACTURER & REPAIRER OF SURGICAL INSTRUMENTS

surgicalholdings.co.uk
01702 602 050

COMMON FEATURES

FINISHES

All Instruments

Manufactured from Martensitic stainless steel, vacuum hardened
Contain a high level of chromium for corrosion resistance
Contain carbon to maintain their hardness
Nitric Acid Passivated for corrosion resistance

Satin/Matt

Good for anti glare during surgery; doesn't dry as well as bright polish

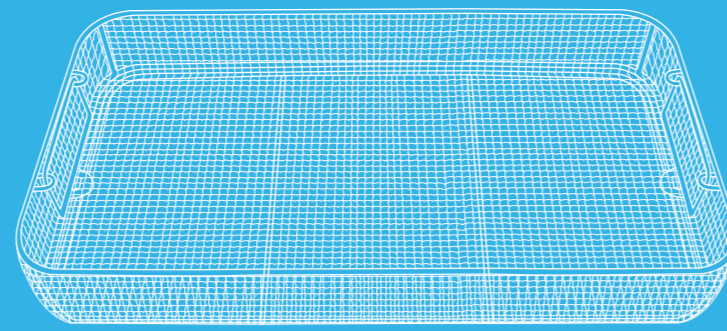

Bright polish

Best finish aesthetically and for washing and drying as it brings the chromium to the surface
